there's a story kicking around about how life magazine destroyed someof the kennedy assassination motion picture film. life says not quite--it was lost but only after all interested parties say it, and after many dupes were made, and it was only six frames anyway.

attached are copies of the six frames lost, if anyone asked for them. note the tree 8x10s show an early frame, a middle one and a final frame.

everything is out except north and south american newspapers and tv.
